## (1) Title of the Practice – Employability of Students

### Objectives:

- To make sure that the students, especially the girls, get employment after they complete the graduation
- To make the students self reliant

### The Context:

The students who get admitted in Panchla Mahavidyalaya come from socio economically backwards sections of the society. Hence they require employment to make themselves economically and socially self reliant and independent.

The college understands this social and economic need of the students and hence it has signed two MoUs with Anudip Foundation and Nari o Sishu Kalyan Kendra to send the students over there to learn self grooming, spoken English, making of sanitary napkins and so on and so forth. This makes the students ready to enter the world of self dependence through self employment.

### The Practice:

1. The students are sent to the training centres of Nari o Sishu Kalyan Kendra and Anudip Foundation to take training in the various courses that they offer
2. At Anudip Foundation, the students learn self grooming, spoken English, mock interview training and basics of job communication. At Nari o Sishu Kalyan Kendra, the girl students learn how to make sanitary napkins. This helps them to become aware of hygiene and sanitation and spread that wareness among their peers and the larger society

## **Evidence of Success:**

- More and more students are becoming interested to enroll themselves in these training programmes
- Students have found placement from Anudip Foundation and they have tasted success professionally from there
- Girl students have learnt about women's hygiene and the need to maintain it from Nari o Sishu Kalyan Kendra

## **Problems Encountered and Resources Required:**

- Social taboo related to women's hygiene
- A general lack of interest in taking a professional training course outside the regular curriculum
- Time management for the students to maintain regular attendance in the college and go for the training courses
- More funds are required to sponsor the economically backward students to get these training programmes

## Online 'Student Profile Mapping'

### (2) Title of the Practice – Online ' Student Profile Mapping' Portal

#### **Objectives:**

To determine the abilities of students in an objective and quantifiable manner and identify

the slow and advanced learners so that appropriate support can be provided by the institution.

#### **The Context:**

Students often face diverse challenges with respect to their skill attributes: wholesome

may belong to economically backward families and have access to limited resources; some may be

intellectually bright or slow irrespective of their economic status; others may have different skills,

emotions and behaviour. A systematic assessment of these attributes of the students may help in

providing an insight into their strengths and weaknesses. The profile

mapping exercise enables the institution to hone the students' strengths and overcome their weaknesses.

## The Practice:

- Students need to login with their login ID and password and answer an online questionnaire.
- Scores on 'General Quotient (GQ)' and 'Empowerment Quotient (EQ)' are calculated on the basis of the answers provided. The General Quotient comprises of Academic score, Intelligence score and Knowledge score. The Empowerment Quotient assesses different types of abilities. It also makes a comparison of the particular student in comparison with his/her peer group. Finally, a weighted average of GQ and EQ gives the final score, which represents the capability of the student.

## Evidence of Success:

- The manual method of psychometry test or profile mapping is too engaging and time consuming, whereas the online mapping is fast, accurate and error-free.
- Marks obtained in class/internal tests are not always reflective of the students' ability; external factors may affect their time spent on studies, understanding of the subject and answer writing skills. However, online mapping appraises their innate capabilities.
- Often, teachers depend on students' class performance or behaviour to gauge their level of knowledge or aptitude. However, this method is suitable only for articulate students. Online mapping is equally effective for shy and introvert students.
- The teachers assert that their assessment about the students

## Problems Encountered and Resources Required:

- The major problem pertains to availability of internet facilities in college. The existing computer infrastructure is inadequate so that online profile mapping takes longer than usual time.
- The students, mostly from poor families have limited access to high-speed data connection.
- Often the students are unable to understand the questions, and so need the guidance of teachers for filling the questionnaire.
- The resources required are competent software developer to implement the entire idea of online profile mapping along with adequate computer infrastructure.
